Stem Broach Gauge

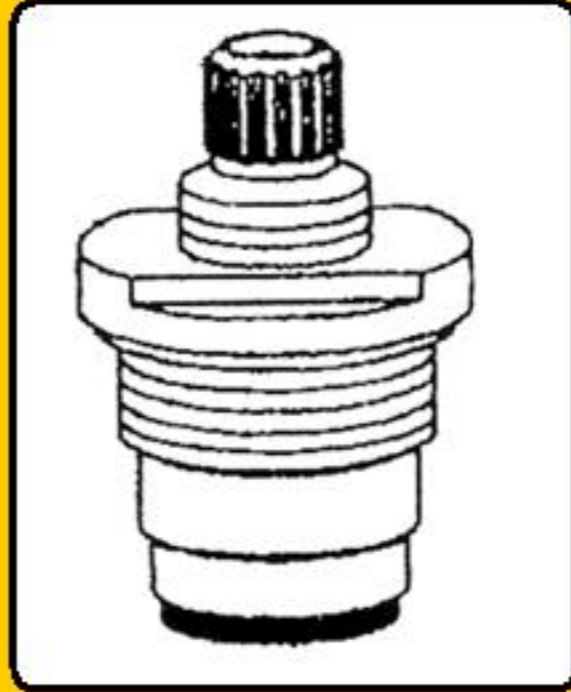

right hand
thread
usually hot

left hand
thread
usually cold

- Disregard the bib screw, bib washer and handle screw from the old stem.
- Place the old stem on the length gauge to determine the catalog section.
- Insert the spline into the broach gauge to determine the group number.
- Compare the size, group and diagram of the stem for a simple and positive identification.

length spline identification

1 12 06N
001-1206N
